

SEALING STRUCTURE AND METHOD OF MAKING THE SAME

Abstract

A sealing structure and a method of making the same . The sealing structure is disposed on an organic light emitting display panel having a substrate and an organic light emitting display unit thereon. The sealing structure includes a passivation structure, a container, and a sealing agent. The passivation layer covers the substrate and the organic light emitting display unit and has a sealing slot extending through to the substrate surface. The seal agent is disposed in the bottom of the sealing slot for combining the container with the substrate surface in the bottom of the sealing slot.
